

How to link a field value from 1 table to another table's field?

Example

Created a [xx] in Stock (QnEBS.BO.Stock.Stocks) and in Sales Invoice (QnEBS.BO.Sales.SalesInvoiceDetails)

then wish to link the value key in Stock (QnEBS.BO.Stock.Stocks) to Sales Invoice (QnEBS.BO.Sales.SalesInvoiceDetails)

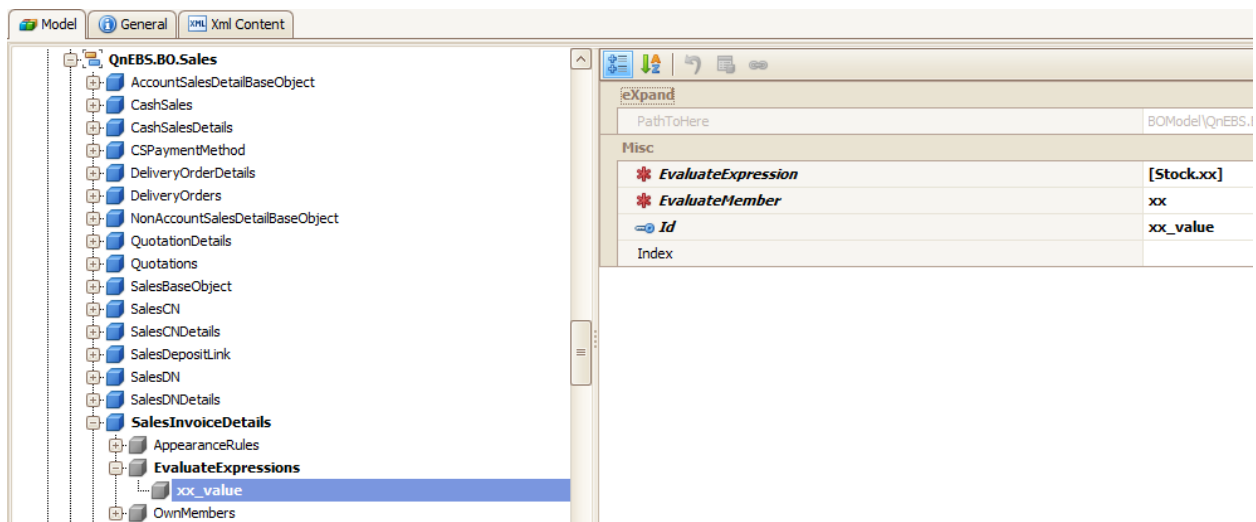

1. Go to QnEBS.BO.Sales.SalesInvoiceDetails and expand it
2. Right click on EvaluateExpressions
3. Select Add > MemberEvaluateExpression
4. Key in as below

EvaluateExpression = [Stock.xx]

EvaluateMember = xx

Id = xx_value

5. Save and re-open QNE Optimum

6. If you test key in an amount (999.99) into Stock.xx

Stock Items

Stock Item

Stock # ☒ Stock Control ☒ Active

Stock Name

Created Date

Default Location

Category

Group

Class

Preset Code

7. When go to Sales Invoice and select the Stock Item, the value of xx will automatically show out according to what you key into Stock.xx

Stock Code	Description	F.Desc	Qty	UOM	Unit Price	Disc	Amount	Tax Code	Tax	Net	Serial No	xx
aaaa	aaaa		1	UNIT(S)	100.00		100.00	SR	6.00	106.00		999.99
